

Orbital7 project that represents a comprehensive suite of development tools specifically designed for Bitcoin Centric Networks. Orbital7 aims to streamline and simply the process of creating, managing and utilizing digital assets on Bitcoin Centric Networks, including Runes, BRC20 and the Bitcoin Network.

Whats really cool about Orbital7 is that it's the worlds first super modular tool suite on Runes, BRC20 and Bitcoin Networks and essentially are here to provide plug and play tools that no other projects are currently providing on these Bitcoin Centric Networks.

They are currently developing 7 tools, which include:

- Apex Fungible lock
- Comet Airdropper
- Genesis inscription / token mint tool
- Nova Token / Inscription Burner
- Nexus MPC Wallet
- Nebula Staking tool
- Celestial vesting tool
