

SPACE CARTELS

Space Cartels

Space Cartels is an economic turn-based mobile game where you take on the role of a Cartel Boss on Planet X in the year 2266.

The game is divided into seasons lasting up to 21 turns, with each turn lasting 8 hours. Making moves in each turn takes about 15 minutes, making it an ideal game for busy individuals who don't have time to dedicate hours to a game. In Space Cartels, you play in your free time - essentially when you would normally be scrolling through Social Media.

The goal of the game is to invest and multiply the resources you receive in the Starter Pack as efficiently as possible. The greater the net worth of your cartel on the settlement day (after the Season ends), the higher your position in the ranking, which translates into a larger share of the collected USDC pool.
